

Northbeam Robotics — Employee Policy Handbook

1. Remote and Hybrid Work Policy

Employees in engineering, sales, and support roles may work remotely up to three days per week, subject to manager approval. Employees are expected to be present in their assigned office (Austin, Lahore, or Berlin) on Tuesdays and Thursdays for team collaboration. Fully remote arrangements require VP-level sign-off and are reviewed every six months. Hardware engineering roles that require lab or workshop access are generally not eligible for more than one remote day per week.

2. Paid Time Off (PTO)

Full-time employees accrue 18 days of PTO per year during their first two years of employment, increasing to 23 days from year three onward. PTO accrues monthly and unused PTO of up to 5 days may be carried over into the following calendar year; any remaining balance beyond that is forfeited. Employees must submit PTO requests at least 5 business days in advance through the internal HR portal, except in documented emergencies.

3. Sick Leave

Employees receive 10 paid sick days per calendar year, separate from PTO. Sick leave does not require advance notice but must be logged in the HR portal within 48 hours of return. Extended medical leave beyond 10 days is handled under the company's separate medical leave policy in coordination with HR.

4. Code of Conduct

All employees are expected to act with honesty, respect, and professionalism in interactions with colleagues, customers, and partners. Harassment, discrimination, and retaliation of any kind are prohibited and may result in disciplinary action up to and including termination. Employees who witness or experience a violation are encouraged to report it to their manager or directly to HR; reports may be made anonymously through the company's ethics hotline.

5. Expense Reimbursement

Business-related expenses (travel, client meals, approved software subscriptions) are reimbursed through the finance portal within 15 business days of submission, provided a valid receipt is attached. Client meal expenses are capped at \$75 per person per meal. Air travel for trips under 6 hours must be booked in economy class; exceptions require director-level approval.

6. Data Security and Confidentiality

Employees with access to customer warehouse layouts, fleet telemetry data, or proprietary perception-model code must use company-issued, encrypted laptops and enable two-factor authentication on all internal systems. Customer data may not be stored on personal devices or transferred outside company-approved cloud storage. Violations of this policy are treated as serious disciplinary matters regardless of intent.

7. Equipment and Lab Safety (Hardware Teams)

Employees working in the Lahore or Austin hardware labs must complete safety certification before operating robot test units, and must wear provided safety footwear and eye protection at all times on the test floor. Unsupervised solo testing of robots in active-motion mode is not permitted outside

designated hours (8am-6pm local time), and a second engineer must be present.
