

Northbeam Robotics — Company Profile

Overview

Northbeam Robotics Inc. is a mid-sized robotics and industrial automation company founded in 2014 and headquartered in Austin, Texas, with an additional engineering office in Lahore, Pakistan, and a regional sales office in Berlin, Germany. Northbeam designs autonomous mobile robots (AMRs) and warehouse automation software used by logistics companies, e-commerce fulfillment centers, and light manufacturing facilities.

Mission

Northbeam's mission is to make warehouse and factory automation affordable and easy to deploy for mid-sized businesses that cannot justify the cost of legacy industrial robotics vendors. The company focuses on modular hardware, fast installation (under two weeks per site), and subscription-based software rather than large upfront capital expenditure.

History and Milestones

Northbeam was founded in 2014 by Dr. Amara Voss (CEO) and Rehan Siddiqui (CTO), both formerly of a large industrial automation firm. The company shipped its first commercial AMR unit, the Beam-1, in 2017. In 2019, Northbeam raised a Series B round and opened its Lahore engineering office to expand its computer vision and fleet-routing software teams. In 2022, the company launched its flagship fleet-management platform, BeamOS, which coordinates multiple robots across a single warehouse floor in real time. As of 2026, Northbeam has deployed over 3,200 robots across 140 customer sites in North America and Europe.

Leadership

Dr. Amara Voss — Chief Executive Officer. Rehan Siddiqui — Chief Technology Officer, based in the Lahore office and responsible for hardware and perception systems. Julia Fernsby — Chief Operating Officer, responsible for manufacturing and supply chain. Tomasz Kowalski — VP of Sales (EMEA), based in the Berlin office.

Industry and Market

Northbeam operates in the warehouse automation and industrial robotics market, competing primarily with mid-market AMR vendors rather than large-scale fixed-automation providers. The company's core customers are third-party logistics (3PL) operators, mid-sized e-commerce fulfillment centers, and light manufacturers with facilities between 20,000 and 250,000 square feet. Northbeam does not currently sell directly to consumers.

Offices

Location	Function	Headcount (approx.)
Austin, Texas, USA	Headquarters, software, customer success	180
Lahore, Pakistan	Hardware & perception engineering	95
Berlin, Germany	EMEA sales & regional support	22
